

CrewBid Jan 2nd, 2022

Important: Is CrewBid going away?

No, CrewBid and WBidMax will not be going away. We comply with all Southwest Airline security protocols and have been an approved 3rd Party Vendor since 1993.

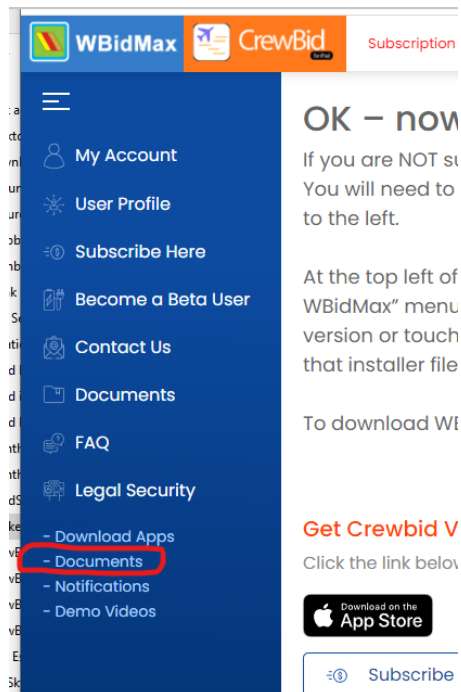

Old iPads running iOS 12.5.5 can now run CrewBid.

What's New?

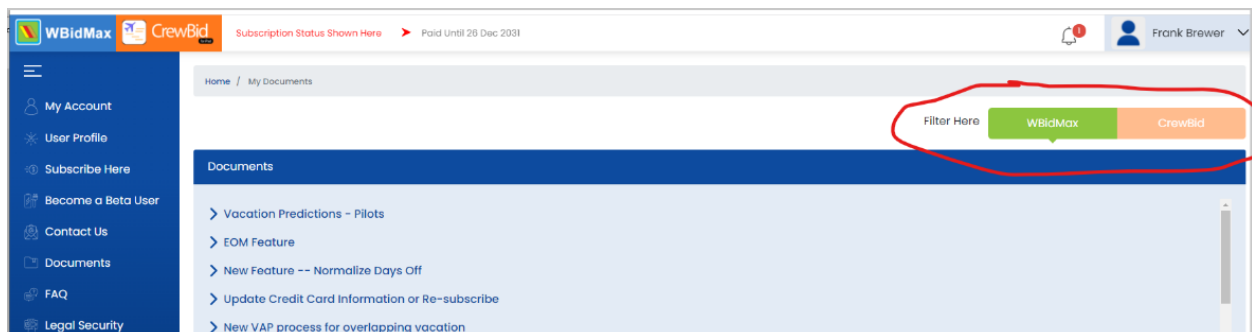

- Miscellaneous Minor Bug Fixes
-

Did you know there are many help documents on the crewbid-wbidmax.com website?

Login to crewbid.com or wbidmax.com and click on the Documents link:

You can then filter for WBidMax or CrewBid documents. Keep in mind that some documents work the same for both, and those documents will be in the WBidMax section.

How Do I find my submitted bids on SwaLife?

For **Pilots**, click on the link below for a detailed document with pictures.

<https://www.crewbid-wbidmax.com/Downloads/PilotfindbidonBidInfo-SwaLife.pdf>

For **Flight Attendants**, click on the link below for a detailed document with pictures

CrewBid Nov 2nd, 2021

We know most don't read the "Latest News", but we highly suggest you read this one. There is a ton of new stuff.

Important: old iPads running iOS 12.5.5 can now run CrewBid.

What's New?

- CrewBid Valet is available
- CrewBid WebApp is available
- Overnight City Filter – can add multiple

CrewBid Valet is available!

CrewBid Valet is designed to run on your **iPhone**.

Many of you will love CrewBid Valet, some will hate it – text is too small. Download it to give it a try.

There are two ways to get CrewBid Valet:

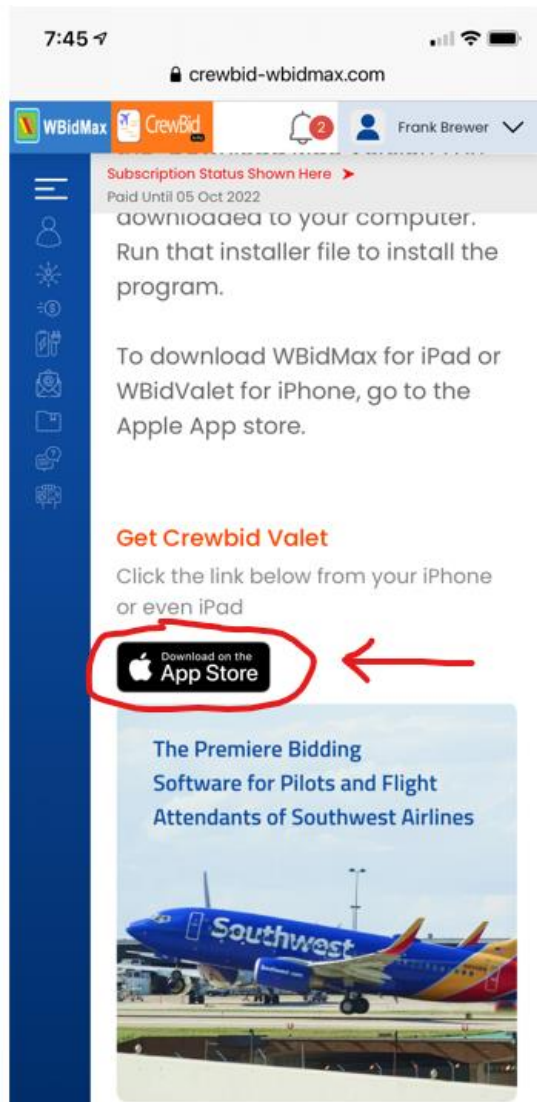

1. Open a browser (Safari) on your iPhone and type in this URL:

<https://apps.apple.com/us/app/crewbid-valet/id1233677874?mt=8>

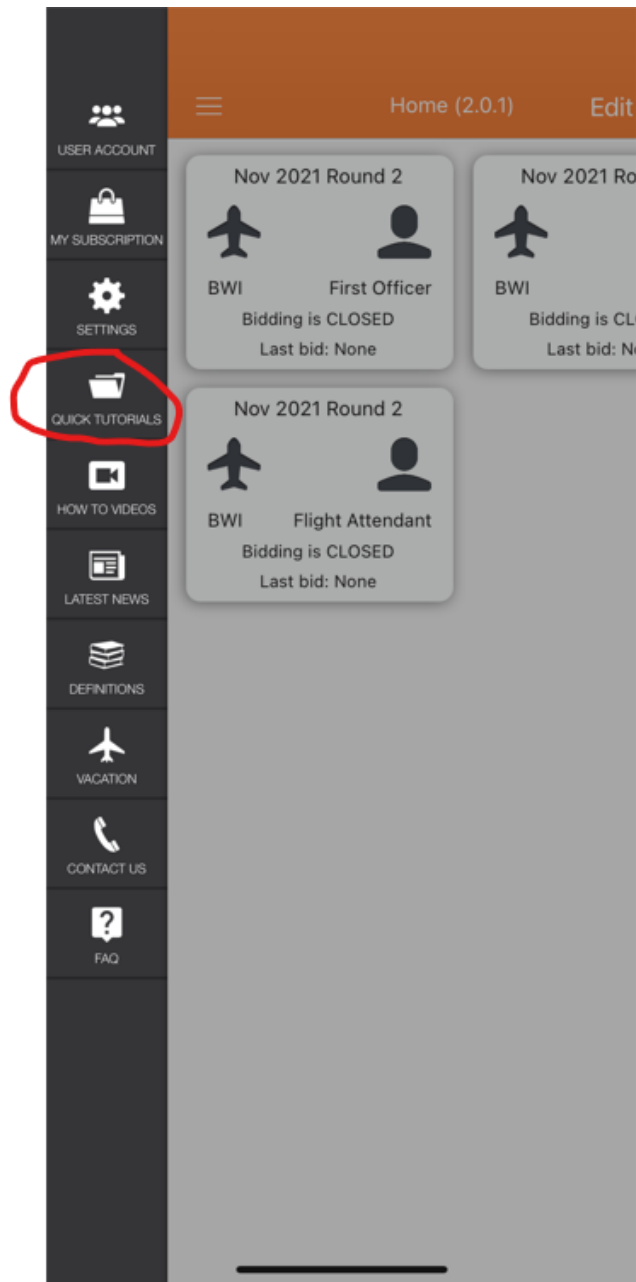

2. Open a browser (Safari) on your iPhone and login to crewbid.com

Scroll down on the home page until you see the screenshot below: Then touch on the “Download on the App Store” button.

You can also download CrewBid Valet to your iPad to check it out, if you want to do so.

If you are comfortable with CrewBid on the iPad, you will likely find CrewBid Valet to be quite intuitive. However, if it is not intuitive for you, please check out the Tutorial. The Tutorial goes through every aspect of CrewBid Valet. Touch the help icon on the home view, then touch the “Quick Tutorials” icon.

In the Tutorial, swipe left to go through the slides. Swipe right to return to a slide.

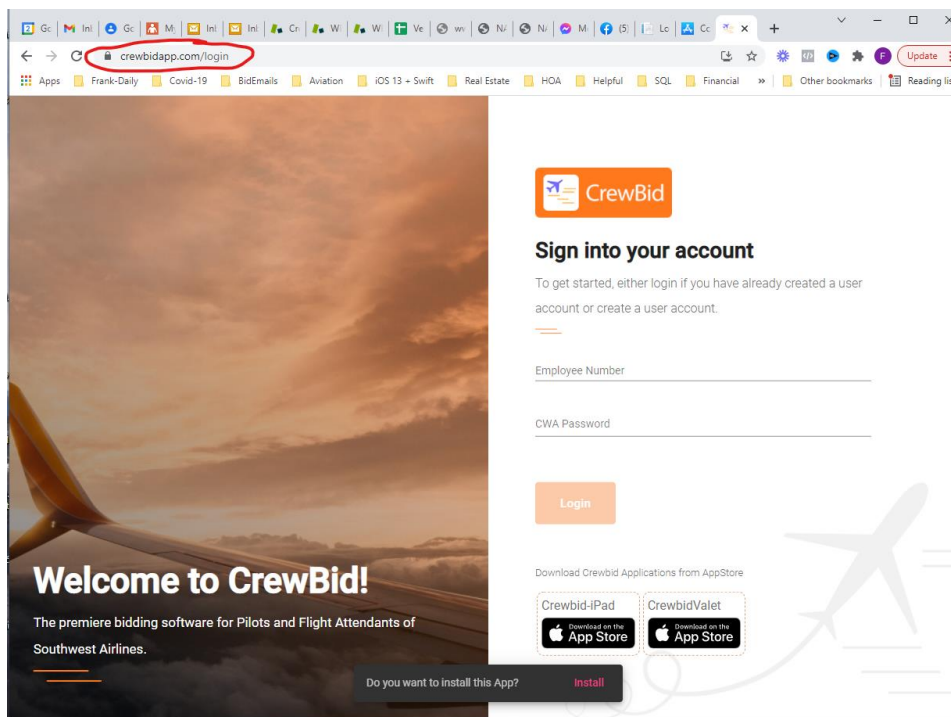

CrewBid WebApp is available!

Yes, you can now run CrewBid in a browser. It is called CrewBid WebApp. You can use any browser (I think 😊), but we test mostly in Safari and Chrome.

To get CrewBid WebApp, go to: <https://crewbidapp.com>

This means you can now run CrewBid WebApp on your PC, Mac, Chromebook, etc. Anywhere you can run a browser, you can run CrewBid WebApp.

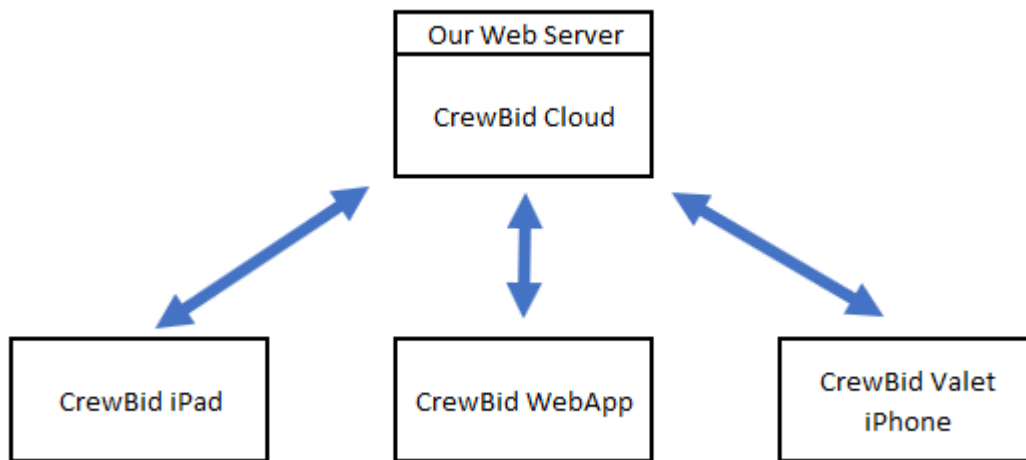

Here is the login to CrewBid WebApp in Chrome. You login with your CWA Credentials.

You will find that CrewBid WebApp operates 99.9% just like it does on the iPad, except you can run CrewBid WebApp

almost anywhere (PC, Mac, iPad, Chromebook, Android Tablet, etc). If you can run a browser, you can run CrewBid WebApp.

You can also Sync your work between applications and devices using Sync.

If you do not know how to Sync in CrewBid, then we suggest you read this document: [CrewBid Sync](#)

Overnight City Filter – can add multiple

You can now add multiple Overnight City Filters

When you do so, you create an **“AND”** condition. Only lines that have both LGB (at least 1) and AUS (at least 1) will show in the scratchpad.

The screenshot displays the WBidMax application interface. The top status bar shows the time as 8:58 AM on Tuesday, November 2, 2021, with a battery level of 90%. The main header includes the 'WBidMax' logo, a version/build identifier '(7.33.24) Nov 2021 BWI CP Rnd 1', and a 'SWAPtimizer' button. The interface is divided into two main sections: a 'Scratchpad - 2 Lines' on the left and a 'Filter' panel on the right.

The 'Scratchpad' section shows a calendar grid for the month of November. It lists two flight lines, '1' and '49', with their respective dates and flight details. Line 1 includes flights from BOS to ICT, BOS to MCI, BOS to AUS, and SAT to BOS. Line 49 includes flights from LGB to BOS, BNA to ISP, CHS to AUS, and DTW to AUS. The 'Filter' panel on the right allows users to refine their search. It includes buttons for 'Filter', 'Sort', 'Preset', and 'Bids' (currently 0). The filter panel is set to 'Overnight City' and includes filters for 'LGB' and 'AUS', both set to 'At Least 1'.

Line	Date	Flight	City	Time	Pay	BkHrs	Chgs	S/Bk	S/Day
1	31	0520	BOS	ICT	21.0	1445	5	6	91.18
	7	0730	BOS	MCI	19.5	0850	12	13	67:50
	14	0730	BOS	AUS	19.5	1400	19	20	6
	21	0540	SAT	BOS	19.5	1100	26	27	1.34
49	28	0730	LGB	BOS	21.0	1100	3	4	7.01
	31	0910	LGB	SAT	21.0	1100	4	5	91.07
	8	0725	BNA	ISP	23.7	1205	10	11	66:45
	15	0825	CHS	AUS	21.2	0635	16	17	6
124	22	1340	DTW	AUS	24.4	1605	24	25	1.36
	29	21.8	1400				3	4	7.59

Using the Overnight Cities – Bulk filter sets an **“OR”** condition.

Here is the Overnight Cities – Bulk filter set with AUS and LGB for overnights. Note the scratchpad shows 72 lines that have at least one AUS **OR** LGB overnight.

The screenshot displays the SWAPtimizer application interface. The top bar shows the time as 9:03 AM on Tuesday, November 2, and the user is logged in as WBidMax. The current filter is set to (7.33.24) Nov 2021 BWI CP Rnd 1. The interface is divided into two main sections: a left sidebar for scratchpads and a main area for city filters.

Scratchpad - 72 Lines

	S	M	T	W	T	F	S

CrewBid Oct 12th, 2021

Important: old iPads running iOS 12.5.5 can now run CrewBid.

What's New?

- Added Calendar to Report Release Filter

New Report-Release Filter

The screenshot shows a web interface for the 'Report - Release' filter. At the top, a title bar reads 'Report - Release(all times in 24 hr Herb)'. Below this, there are several filter options: 'All Days' (unchecked), 'Trip / Work Block' (unchecked), and 'Dates' (checked). Under 'Trip / Work Block', there are sub-options: 'First' (unchecked), 'Last' (unchecked), and 'No Mid' (unchecked). To the right of these options are two input fields: 'Report NET' and 'Release NLT', both with 'HHMM' placeholders. Below these fields is a 'Calculate' button. At the bottom left, there is a 'Choose Date' button with a calendar icon next to it. A red arrow points to the 'Dates' checkbox, and a red underline is under the 'Choose Date' button.

Note, you can now Filter on specific dates for Report-Release.

CrewBid Valet

What the heck is CrewBid Valet? After 2 years of development, we will be releasing CrewBid on the iPhone!!!!

Why did we call it CrewBid Valet?

Apple will not allow us to use iPhone in the name and we cannot have two different apps in the App Store with the same name.

	S	M	T	W	T	F	S

CrewBid Valet operates exactly like CrewBid on the iPad – it is just smaller due to the size of the iPhone screen.

Some will find this not usable due to it being too small to see.

Most will find it incredibly convenient for getting in a bid very quickly.

Many will ultimately just use CrewBid Valet.

You can Sync back and forth from CrewBid iPad to CrewBid Valet.

Here is the best part:

There is NO increase in subscription cost!

Your current subscription allows you to use ALL of our Apps!

Can I find my submitted bid on SwaLife -- Yes!

- **CrewBid** for iPad version 7 – **New Version** 7.33.22
- **WBidValet** for iPhone version 8 **New Version** 8.1.0

Sep 2nd, 2021

Very IMPORTANT

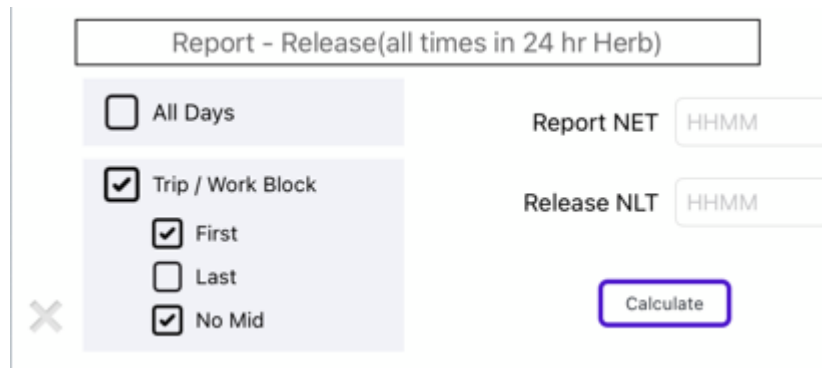

Last month we advised that starting on September 1st, you would no longer be able to find CrewBid in the app store.

This change is now on hold. For the time being, Apple is allowing us to stay in the App Store.

What's New?

- New Report Release Filter
- Etrips Line Value Added
- Etrips Sort Added

New Report-Release Filter

The screenshot shows a web interface for filtering reports. At the top is a title bar that says "Report - Release(all times in 24 hr Herb)". Below this is a sidebar with a close button (X) and a list of filter options: "All Days" (unchecked), "Trip / Work Block" (checked), "First" (checked), "Last" (unchecked), and "No Mid" (checked). To the right of the sidebar are two input fields: "Report NET" and "Release NLT", both with "HHMM" as a placeholder. Below these fields is a "Calculate" button.

You can now check for reports just on the first day of a trip and the last day of a trip.

Additionally, if you have back-to-back trips, you can ignore the middle part of the work block by checking the “No Mid” box (no middle).

You can find a detailed article discussing this new Filter in the link below.

<https://www.crewbid-wbidmax.com/Downloads/TheNewReport-ReleaseFilter.pdf>

Etrips line value added

You can add Etrips as a line value and it will show you the number of ETOPS trips on the line.

New ETOPS Trips Sort

If you select ETOPS Trips, it will now sort on the number of ETOPS Trips in the line. Don't confuse ETOPS sort with ETOPS Trips.

The ETOPS sort will just sort lines that are ETOPS from lines that are non-ETOPS>

- **WBidValet** for iPhone version 8 **New Version** 8.0.63.0

Jul 2nd, 2021

Very IMPORTANT

Starting on **August 1st**, you will no longer be able to search the App Store for WBidMax for iPad or WBid Valet for iPhone. If you do search, the two apps will NOT show up in the search.

Apple has decided that “Limited” user apps, like WBidMax for iPad and WBid Valet for iPhone do NOT belong in the App Store.

However, the Apps will still be in the App Store, but you just won't be able to search for the App.

INSTEAD, there will be a direct link to the App that I will be providing on the website: wbidmax.com

The link will look something like this:

<http://apps.apple.com/us/wbidmax/id xxxxxxxx>

Also, as you know, when we release a new version of WBidMax for iPad, and the version you have installed is “**NO LONGER SUPPORTED**”, you will get an alert in your WBidMax for iPad app letting you know the version is “**NO LONGER SUPPORTED.**”

The **GOOD NEWS** is we will be adding a link in the alert that will take you directly to the hidden App Store to download the latest version.

You can also Help Yourself: set WBidMax for iPad to Auto Update in your iPad settings:

Settings=>App Store=>App Updates – ON.

The “**BAD NEWS**” is that new users will have difficulty finding WBidMax for iPad. They may not readily know to go to the website (wbidmax.com) using Safari on their iPad, to click on the link to download the app. You can help out new users by letting them know to open Safari on their iPad and then login to wbidmax.com. They will then be able to find a link

to download the WBidMax for iPad and WBid Valet for iPhone apps.

What's New?

- **“D” position lines will be automatically removed from your bid if you are Buddy Bidding.**

“D” Position Lines Removed when Buddy Bidding (Flight Attendants Only)

If you are Buddy bidding, all “D” position lines will be removed from your bid as you can only bid A, B, and C positions when Buddy Bidding.

Jun 2nd, 2021

What's New?

- **“M” Trips**
- **CrewBid Trip Display not showing Rig**
- **Flight Attendant EBS trick and late bid submission**
- **“Smart Punctuation” that is NOT so smart ☹️**

“M” Trips (Pilots Only)

Last month in the 2nd Round, the company added a new kind of trip to the supplemental bid data -- “M” trip. You can identify an “M” trip by the second letter in the trip name: LM23, BMA1, DMEA, etc.

An “M” trip is an “original” trip in the 2nd round. These trips do not exist in the first round. These trips are different from “P” trips, in that “P” trips are the fragments of trips left over after correcting lines for vacation and monthly overlap.

We were not aware of this change, so as you can imagine, none of our Apps would successfully download bid data on the 16th when the Pilot 2nd round bid data was released.

As you are probably aware, I always have my full team monitoring the bid data release, just so we can identify problems, and find a solution. We were able to create a proper bid data solution by the morning of the 17th, and all was well in Bid Land.

Flight Attendant EBS trick and late bid submission

Every month we have users who attempt to submit a bid in the last minute of the bid period. If you find yourself in this situation, there are network issues that are beyond our control. Specifically, the Southwest 3rd Party server that receives the submitted bid, can and does get overloaded. When this happens, you will get back a weird message from the 3rd Party server, but the result is your bid was NOT submitted and the attempt timed out with the server.

REMEMBER: only if you get back a “Bid Receipt” with a date time stamp on the “Bid Receipt”, will you know that your bid was submitted.

If you are a flight attendant and find yourself in this situation (attempting to submit a bid in the last few minutes), here is a trick you can employ. Prior to 1200, login to EBS. Then if you bid from WBidMax or CrewBid times out and does not get submitted, you can then manually submit a bid via EBS, because you were logged in prior to 1200.

The deadline for submitting a bid with WBidMax or CrewBid has always been 1200 on the last day of the bid period. You

can submit a bid via EBS up to 1300 if you are logged into EBS prior to 1200.

NOT SO SMART “Smart Punctuation”

We had several users who had difficulty logging into the website and downloading bid data last month. It turns out the character number for the quote key (") on the virtual iPad keyboard is different than the rest of the world. Huh?

The solution was to go to Settings => General and on the right turn of “Smart Punctuation”. After doing this the quote symbol on the virtual iPad keyboard acted normally.

May 2nd, 2021

What's New?

- Improvements to the Vacation Prediction Algorithm
- Added 6 new properties for VA and VAP
- Be aware of Weird AM/PM lines

Improvements to the Vacation Prediction Algorithm (PILOTS)

You would think that after doing this for 8 years, we would know all the details of rig distribution. We didn't! There are nuances that we continue to learn. Did you know that ALL ADG and THR rig is placed on the last duty period? Well, except if the trip is split for vacation, in which case the ADG and THR rig is distributed using distribution rules (lowest duty periods until all duty periods are equal and rig is exhausted).

Added 6 new properties for VA and VAP

VA is the calculated vacation pay from a trip in your vacation week. VAP is any added tfp that gets you up to the vacation guarantee. You can display these values for Bp (in bid period) Ne (next bid period) and Bo (both current and next bid periods). Here are the 6 new values:

- VAbp
- VAnE
- VAbO
- VAPbp
- VAPne
- VAPbo

Be aware of Weird AM/PM lines

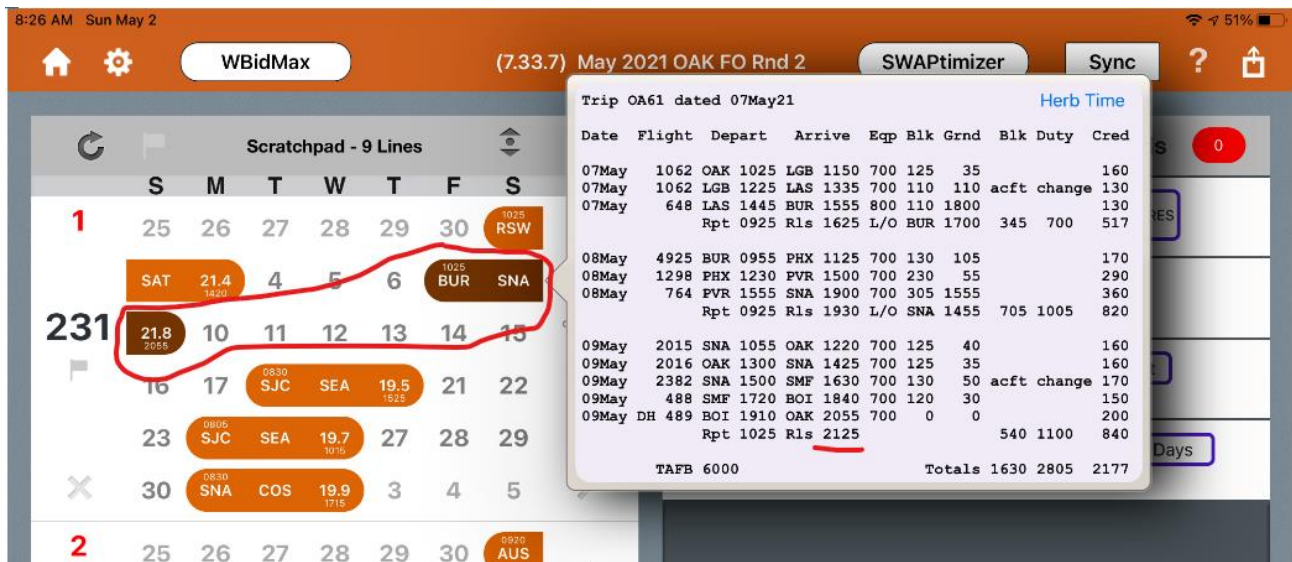

In this era of diminished schedules (it is improving), there are AM lines that will randomly have a landing very late.

You may want to consider FILTERING Mix lines to help remove these odd lines.

The company definition of a PM is simple. Any trip taking off at 12:00 pm (Herb) or later, is considered a PM line. Any trip taking off before 12:00 pm (Herb) is considered an AM trip.

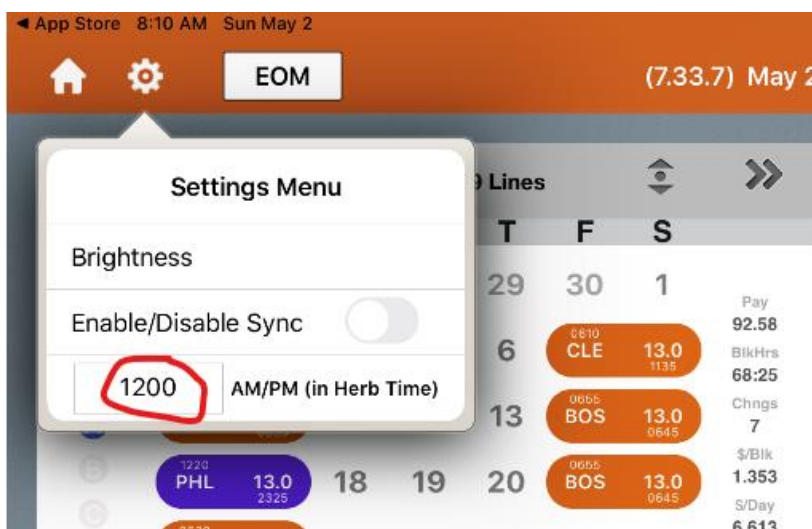

An AM line has ALL AM trips. A PM line has ALL PM trips. A MIX line will have AM and PM trips.

Let's look at the following AM trip (the first takeoff is prior to 12:00 pm Herb)

If you are an AM flyer, this trip might get you by surprise.

You can avoid lines like this by SORTING on Latest Arrival High to Low, so you can then trash those lines that arrive TOO late for your liking. Remember, to trash a line in the scratchpad, you touch the X in the lower left corner of the line. Once you trash a line, there will be a red badge to the left of the Circular Arrow showing how many lines have been trashed. You can always recover ALL or the latest trash line

by touching the Circular Arrow.

If you don't like the companies cut off for an AM or PM trip, you can change the cut off. Touch the Gear icon on the tool bar to display the Settings

Menu.

Finally, you should also check out the Filter “Mixed AM/PM Lines”.

What's New?

- **Invalid Credential Alert**
- **Hey – Weird Stuff is Happening!**

Invalid Credential Alert

Many of you know that the password used for swalife.com and swacrew.com can become unsynchronized.

That means it is entirely possible to login to swacrew.com, and when you attempt to use the same password to download bid data in WBidMax, you get an “Invalid Password” alert.

This happens when the password you are using is still valid on swacrew.com but has expired on swalife.com – yes, every month we hear from several users about this scenario.

The way to tell, if your SwaLife password has expired, is to open a browser (Safari) and try to login to swalife.com.

99% of the time, you will find that your SwaLife password has expired.

Hey – Weird Stuff is Happening!

Every month we have users who report the CrewBid is stuck, or that they cannot move lines from the scratch pad to the bid list, or other weird stuff.

The 99% Solution is to quit CrewBid, re-start your iPad, and then restart CrewBid.

Why does this work 99% of the time? The iPad internals are like a massive jungle warfare and free for all. It is NOT uncommon for USERS to have 10, 20 other APPs running in the background. Every one of those APPs are fighting for use of the memory of the iPad, as a result, sometimes different APPs try to use the same piece of memory and when this happens – **Weird Stuff Happens**. Just restart your iPad and this will fix 99% of the problems. If not, then send us an email. Go to Help(?) => Contact Us and let us know about the problem. Send a screen shot of the problem if you can do so.

What's New?

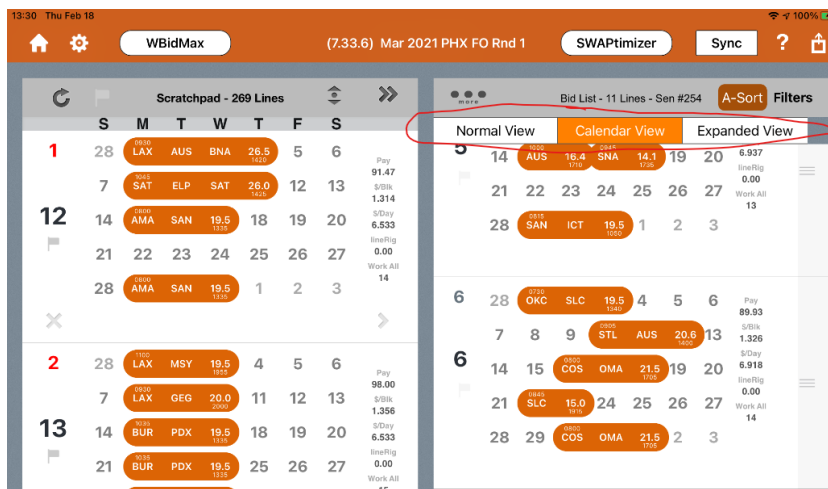

- **3 View Buttons for the BidList**
- **Position Numbers in the Scratch Pad**
- **Invalid Credential Alert**
- **Hey – Weird Stuff is Happening!**

3 View Buttons for the BidList

You no longer need to remember “Hard to Remember” gestures to change the view of the bid list. As shown below, the 3 buttons now easily change the bid list from Normal View to Calendar View or Expanded View. Here is the “Normal View”

Here is “Calendar View”

Here is “Expanded View”. BTW, to close the Expanded View, just touch the X at the top left of the view.

13:31 Thu Feb 18		Expanded Bid List															
1	1	Pay	91.50	\$/Blk	1.224	\$/Day	7.038	lineRig	0.00	Work All	13						
2	2	Pay	90.82	\$/Blk	1.321	\$/Day	6.986	lineRig	0.00	Work All	14						
3	3	Pay	90.50	\$/Blk	1.263	\$/Day	6.962	lineRig	0.00	Work All	13						
4	4	Pay	90.47	\$/Blk	1.188	\$/Day	6.959	lineRig	0.00	Work All	13						
5	5	Pay	90.18	\$/Blk	1.258	\$/Day	6.937	lineRig	0.00	Work All	13						
6	6	Pay	89.93	\$/Blk	1.326	\$/Day	6.918	lineRig	0.00	Work All	14						
7	7	Pay	89.57	\$/Blk	1.259	\$/Day	6.890	lineRig	0.00	Work All	14						

Position Numbers

Some have been confused by the RED numbers in the scratch pad. The RED numbers are just the position number of the line. As show below, line 342 is in position 1, line 343 is in position 2, etc.

TestFlight 10:24 Sat Feb 20		WBidMax (7.33.6) Mar 2021 BWI CP Rnd 2 SWA

- **Invalid Credential Alert**

Month-to-Month Vacation Alert (**Pilots Only**)

Month-to-Month Vacations have lots of Opportunity, but only if you know the rules and limitations that exist with Month-to-Month Vacations. Since we get many after the fact emails regarding Month-to-Month Vacation predictions, we thought it would help if we popped up an alert when you have a Month-to-Month Vacation. It will look like this:

You can touch/click the links to read documents that may refresh your mind on the Limitations and Opportunity.

Commutable Line Auto Non-Stop Only

The Commutable Line – Auto constraint will find lines that are commutable based on your settings. We previously looked at non-stop and 2 flight possibilities. We have added a "Non-

Stop" check box. If you click that checkbox, the "Set connect time" will show "--" and only Non-Stop Flights will be checked for commutability.

What's New?

Improvements to our Vacation Prediction Algorithm!

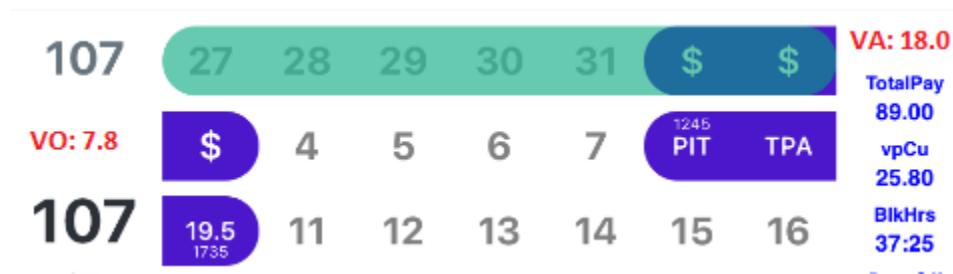

Yes, we made significant improvements, but we also made a coding error. One missed line of code allowed an obvious trip split for two days of VO in front of the vacation. Because a concerned user wrote us, we were able to find this error. If you see a vacation prediction that does not look correct, please send an email so we can investigate.

PILOTS ONLY: How is it possible for Swaptimizer and WBidMax vacation predictions to be wrong for a Month-to-Month Vacation?

Did you know that the two days of vacation that are predicted to pay 7.5 could actually be 0 tfp?

If you don't understand, then we suggest you read this document: [The Limitations and Opportunity of a Month-to-Month Vacation.](#)

This vacation prediction for a pilot is pretty straight forward. It predicts 18.0 of VA for 1-2 Jan and it predicts 7.8 of VO for 3 Jan. Total predicted

vacation pay is 25.8 tfp.

Do you understand that the VA pay of 18.0 on 1-2 Jan could be lowered to 7.5 tfp?

If you don't understand, then we suggest you read this document: [The Limitations and Opportunity of a Month-to-Month Vacation.](#)

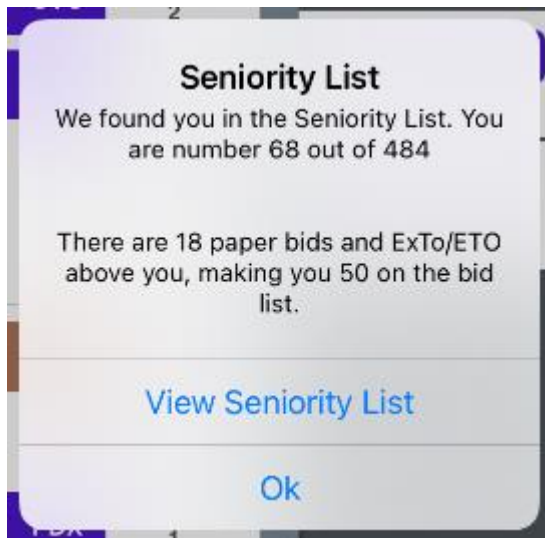

If your head does not hurt already, there is a final companion document called: [Who wants 65 tfp for one week of Vacation?](#)

The above document references downloading an excel document to closely approximate your 55 FDP hour legalities. You can do so by so by logging into wbidmax.com or crewbid.com and then clicking on the Documents tab.

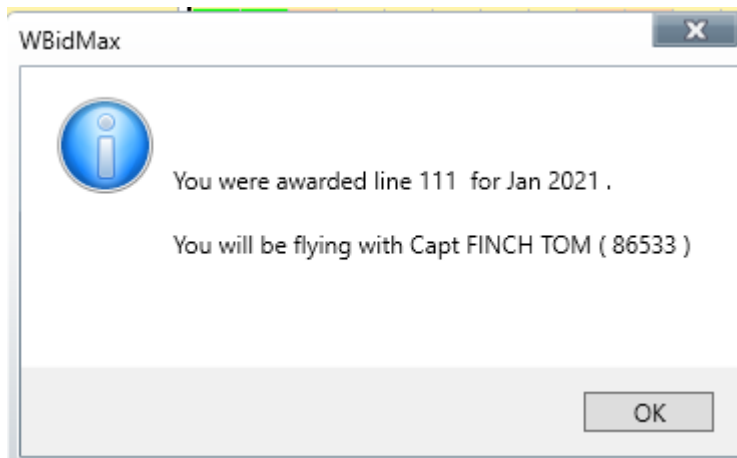

The look for the link "**Rolling 7-day FDP Template**". I'm aware that most users will not want to undertake this work, but there are many who will.

More Information for Pilots on the Seniority List

You will now be given more information to where you reside on the seniority list. If there are "P" (paper bidders) above you, they will be subtracted from the seniority list count.

When you download the Bid Awards, you should now get an improved alert showing who you are flying with (n/a for Paper Bids, Reserve, or Blank Lines)

What's New?

AM/PM – you decide!

Previously, we declared a line to be either AM or PM based upon what the company thought the line should be. Now, with the new AM/PM setting, you get to decide if a trip is an AM or a PM. The default setting is 1200 Herb.

This works on the trip level. As shown above, every trip that takes off later than 1100 will be considered a PM. If you want a trip that takes off at 1100 to be considered an AM trip, then set 1101 in the setting.

If all of the trips on the line are an AM, then the line is considered an AM line. Vice versa, if all of the trips on the line are a PM, then the line is considered a PM line.

Otherwise, the line will be considered a Mixed AM/PM line.

Improvements to our Vacation Prediction Algorithm!

While our Vacation Predictions for Flight Attendants is 99.9% accurate (contractual provisions are very tight), the Vacation Predictions for pilots has been approximately 98% accurate.

The Pilot Vacation contract rules are much less defined, but at the same time provide a more lucrative vacation pay opportunity.

We did an exhaustive analysis and found several tweaks to the code that should move Pilot vacation predictions towards that mythical 100% accurate.

CFV (Pilots: Cash out Floating Vacation)

Last month we saw something in the Pilots seniority list that we have never seen. CFV (cashed out Floating Vacation). We have modified our code and if you have a CFV for the month it will add 26.25 tfp to the line total pay.

LineRig for Flight Attendants!

The company is no longer paying LineRig for Flight Attendants. We have removed LineRig from the calculation of Total Pay for Flight Attendants.

New Website: crewbid-wbidmax.com

The good news is you can enter wbidmax.com or crewbid.com in the browser and it will take you to the new website.

Buddy Bid for Flt Att is now available in CrewBid

If interested, you can read about this feature here:

<https://www.crewbid-wbidmax.com/Downloads/BuddyBiddingforCrewBidv2.pdf>

Flight Data Changes

The company continues to change Flight Data on a frequent basis. If it does change, it will affect Commutability and also vacation predictions for Pilots (Flight Att vacations are NOT affected).

If it is possible for us to update the Flight Data more than 24 hours prior to the bid close, we will do so, and then send you an email.

If or when this occurs, you will need to re-download the bid data to get the new Flight Data file.

The current CrewBid version is: 7.32.2

TAFB 035 Totals									0-25 16935 2600

After conferring with Flt Ops Crew Planning, they have determined that they are not able to fix the discrepancy with the bid data.

As a result, trip LP11 on the 26th will be pulled with Pay after the line is awarded. The line will still pay 89.

This means line 237 will fly only 7 days and still pay 89.

September 2nd, 2020

All – Important!

As most of you know, the flight schedule has been changing like the weather. We rely on the latest schedules to calculate Commutability and Pilot Vacation Predictions. Flight Attendant Vacation Predictions do not rely on the flight schedule.

We update the latest flight schedule on the 1st, to be ready for the Flight Attendant 1st Round Bid opening on the 2nd.

What happens if the Southwest Flight schedule changes after the 1st?

We check daily to see if the Southwest Flight Schedule has changed. If the schedule has changed, and there is more than 1 day left in the bid period, we will update the “Flight Data” for the App.

Additionally, if there is more than 24 hours left in the bid period, we will update the Vacation Files.

Unfortunately, the only way you will know this is via email from us. We will send the notification email to your email address on file with your account. This email will always have instructions and to whom the email applies.

When we send email, typically only 70% will see the email. It is in your best interest that your email is correct and does not block email from crewbid.com or wbidmax.com

The current CrewBid version is: 7.30.17

June 2nd, 2020

One thing for certain, almost every month there is a change from Apple, Southwest, or our occasional poor coding, that will catch us off guard.

However, you should know by now, we monitor the bid period closely and if there is a significant problem, we typically will have it fixed in less than a day.

Two months ago, the 2nd Round for Pilots really threw us for a loop. Every trip in the second round was a Partial Pairing. So, what is a Partial Pairing?

Note above, the second letter in the Trip name is a "P". This is a partial pairing. Note the above trips has only minimal detail. Basically it has the 1st takeoff, the last landing and the pay for the trip. Note there are NO details for the duty periods and no flight details.

Turns Two Days Three Days Four Days

Note the above trip view has all the detail. This detail does NOT come with the bid data. We gather the data and create a file for all of the Partial Pairings, and then CrewBid will download this special file to fill in the gaps for PILOT 2nd Round Partial Pairings.

If you are an early bird, downloading the bid data, there is a chance we will not have yet created the special Partial Pairing file. If that is the case, and you note some trips have minimal detail, just wait a few hours and re-download the bid data.

As will all new features, this new capability for Pilots in the second round will likely have some growing pains. But rest assured we will find the issues and get it fixed.

READ THIS

Flt Attendant 1st Round – Re-DO

Be sure you Download the Bid data – DO NOT REBID Bid Data you previously downloaded from Apr 11th to Apr 14th.

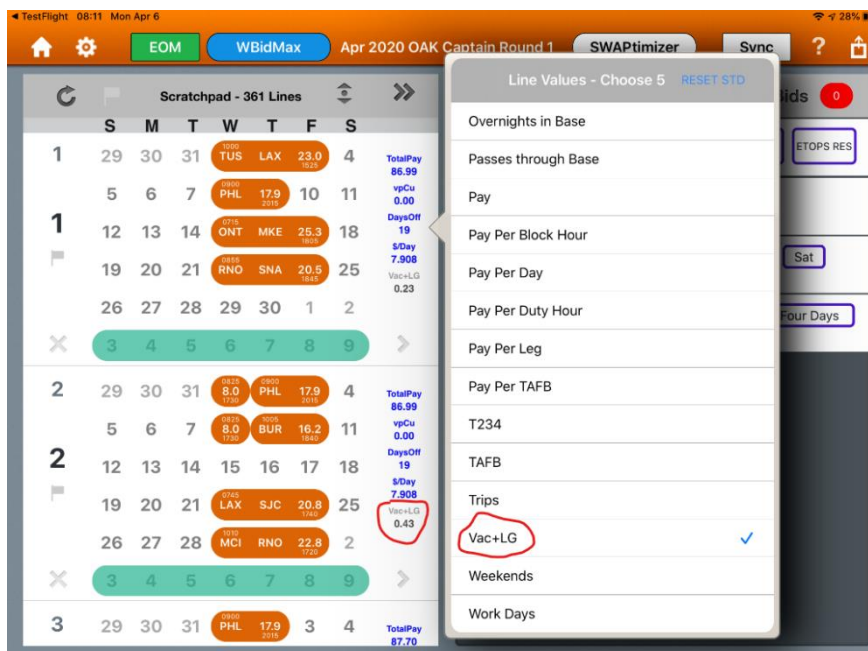

Do NOT open any of the OLD Bid Data icons on the home page.

Be Sure to touch the + icon and select New Bid Period then 1st Round in your settings.

What is New this month?

- CrewBid 7.30.5 is the current version
- New SORT and Line Value: Vac + LG
- **Update your User Account if needed, many of you have outdated names, email, and cell numbers.**

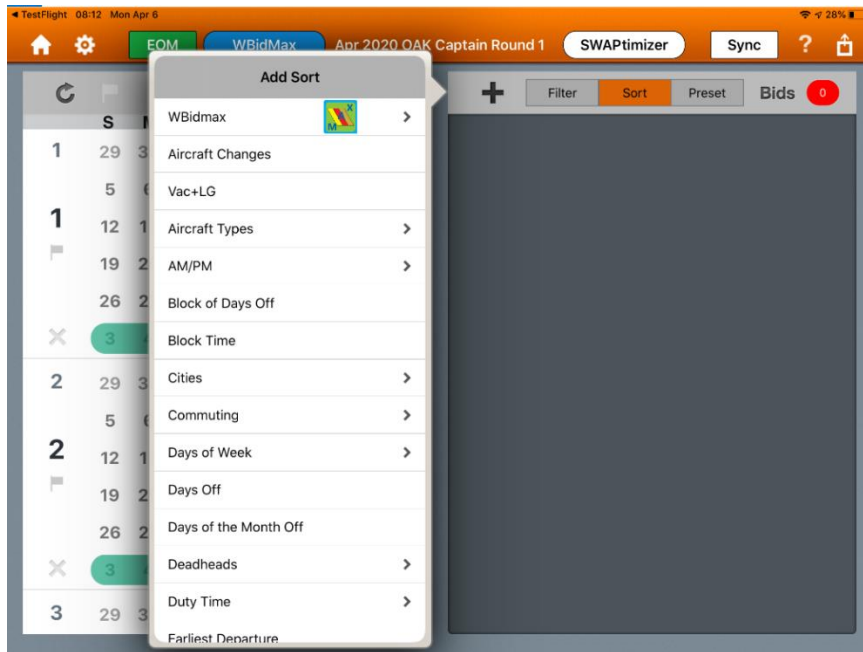

Shown to the left is Vac+LG added as a line value.

To display all the possible line values, just long press (touch and hold) in the line value area and the menu will

appear. Vac+LG adds the vacation pay for the bid period to the Line Guarantee (LineRig).

You can also sort on Vac+LG

Here in the SORT view, you can see I've touched the + icon to display the menu of SORT values.

Vac+LG is added 3rd from the top, so you can more

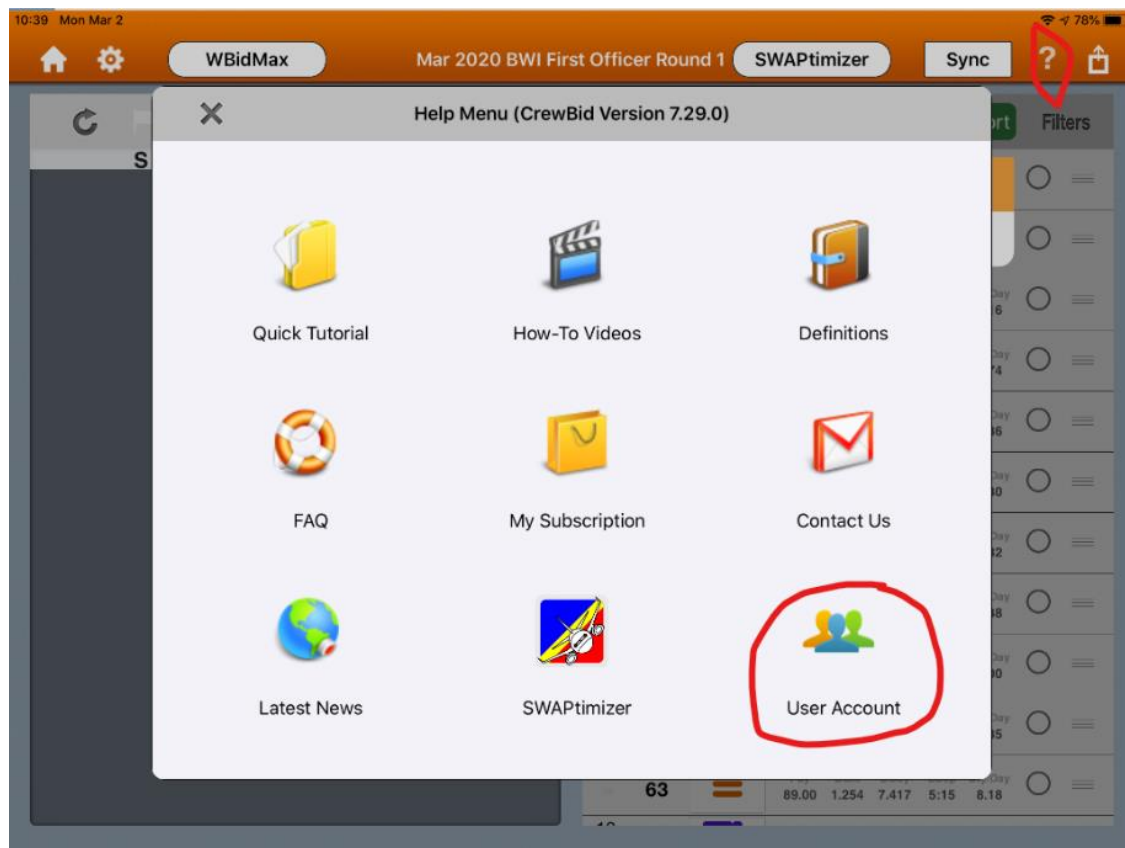

readily find the SORT. Next month it will be alphabetical in the order.

If you add Vac+LG, you will have the ability to SORT on the value of Vacation Pay in the Bid Period + Line Guarantee.

Be sure you SORT High to Low.

Update your User Account – if needed!

Every month we have users we cannot contact, because their user account information is NOT current. Additionally, many YAHOO email accounts block mail from us. You might consider getting another email account like Gmail.

Touch the ? on the tool bar to display the Help view. Then touch “User Account” to display your User Account details.

What is New this month?

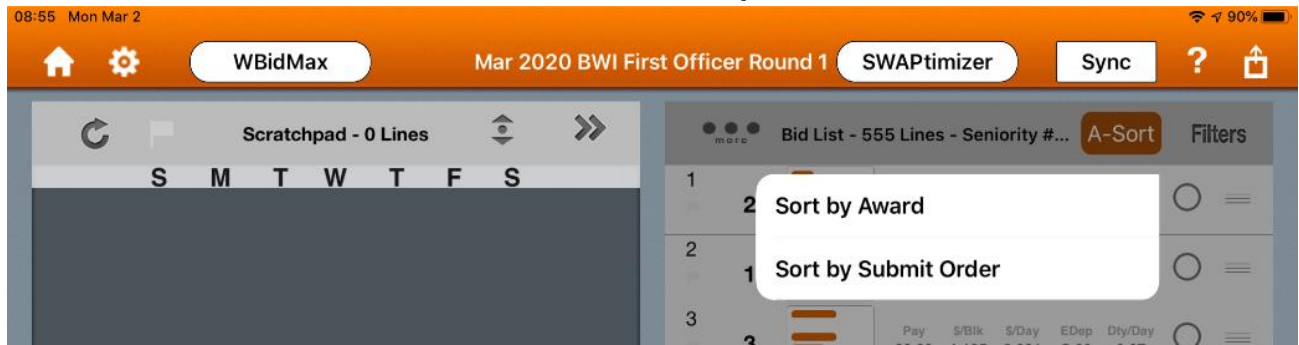

- CrewBid 7.29.1 is the current version
- New Bid List SORTs
- **Update your User Account if needed**

We have implemented our First and Probably Last Bid List SORTs. All our regular SORTs only work on the scratchpad.

The screenshot shows the WBidMax mobile application interface. At the top, the status bar displays '08:55 Mon Mar 2' and '90%' battery. The app's header bar is orange and contains a home icon, a settings gear, the text 'WBidMax', the title 'Mar 2020 BWI First Officer Round 1', a 'SWAPtimizer' button, a 'Sync' button, and help/question mark and share icons. Below the header, the interface is split into two main sections. On the left is the 'Scratchpad - 0 Lines' section, which has a dark grey background and a header with the days of the week 'S M T W T F S'. On the right is the 'Bid List - 555 Lines - Seniority #...' section. This section has a header with 'more', 'A-Sort' (highlighted with a red arrow), and 'Filters'. The bid list itself is a table with 11 visible rows, each representing a bid. Each row includes a line number, a seniority number, a visual representation of the bid (a series of horizontal bars), and several numerical columns: Pay, \$/Blk, \$/Day, EDep, and Dty/Day. The data for the first row is: Line 1, Seniority 2, Pay 89.00, \$/Blk 1.214, \$/Day 8.001, EDep 5:35, Dty/Day 9.14. The data for the 11th row is: Line 11, Seniority 11, Pay 89.00, \$/Blk 1.293, \$/Day 7.417, EDep 5:15, Dty/Day 8.33.

Line	Seniority	Pay	\$/Blk	\$/Day	EDep	Dty/Day
1	2	89.00	1.214	8.001	5:35	9.14
2	1	91.70	1.174	8.336	5:45	9.93
3	3	89.00	1.185	8.091	5:30	9.67
4	4	89.00	1.205	7.417	5:15	9.04
5	5	89.00	1.219	7.417	7:20	8.56
6	6	89.00	1.249	7.417	5:40	8.56
7	7	89.00	1.242	7.417	7:15	8.60
8	8	89.00	1.193	7.417	5:15	8.85
9	9	89.00	1.222	7.417	5:10	8.86
10	10	89.00	1.276	7.417	5:20	8.59
11	11	89.00	1.293	7.417	5:15	8.33

Note the new “A-Sort” button on top of the Bid List.

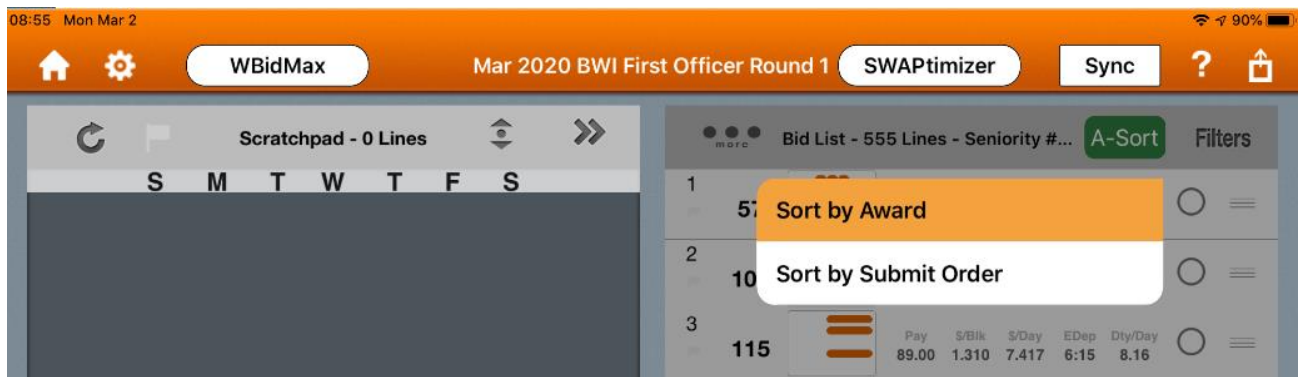

Touch the “A-Sort” button to reveal:

- Sort by Award
- Sort by Submitted Order

If you touch the “Sort by Award” menu item, and the awards are available, the Bid List will be sorted by award order. There will be a red outline of your line.

Any line below your awarded line, is a line you could have had.

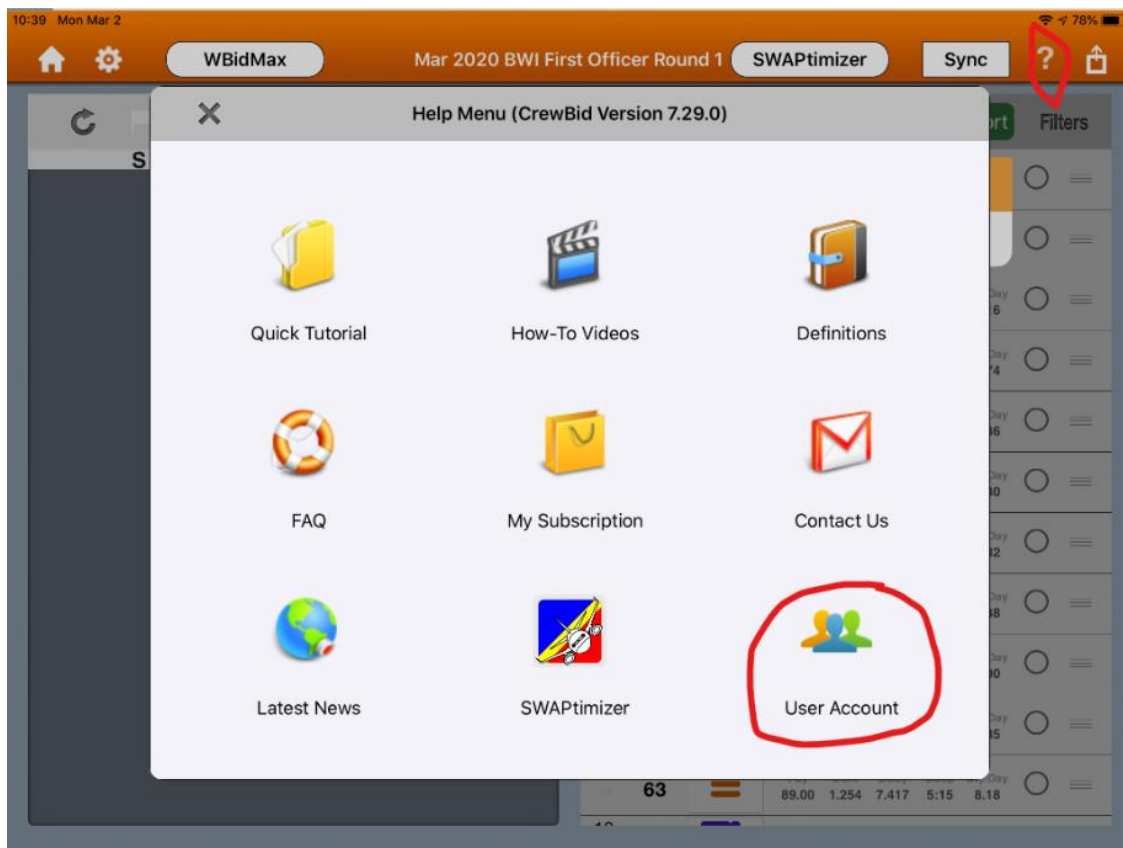

If you want to put your bid list back in the previous order, just touch the orange “Sort by Award” menu item and it will turn white and the bid list will revert back to the order that previously existed.

Regarding the “Sort by Submit Order”, we only retain your last submitted bid.

Update your User Account – if needed!

Every month we have users we cannot contact, because their user account information is NOT current. Additionally, many YAHOO email accounts block mail from us. You might consider getting another email account like gmail.

Touch the ? on the tool bar to display the Help view. Then touch “User Account” to display your User Account details.

10:40 Mon Mar 2 WBidMax Mar 2020 BWI First Officer Round 1 SWAPtimizer Sync ?

Feb 1, 2020

What is New this month?

- CrewBid 7.28.0 is the current version

Not much is new this month, other than the random Bug fixing.

However, we have been hard at work on two HUGE improvements to both WBidMax and CrewBid.

The first improvement, (available later this month) will give you the Option to SORT the lines IAW the way the lines were awarded. The APP will scroll to your AWARDED line and your awarded line will be in a RED rectangle as shown below. You will then be able view all the lines below your awarded line, to see WHAT LINES you could have had.

Obviously, this feature will not be available until after the Line Award file is available on the company server (typical 1 day after bids close)

The only exception is if you are logged in by 12 noon on CWA and you are using the Electronic Bid Sort (EBS) feature. This will not work with CrewBid or WBidMax.

Subscription Problems

We have completely re-written the code for subscription in-app. Yes, this is scary. No worries, we have an emergency backup in place, should our new code be less than great.

If you subscribe, and you do not get notification that your subscription has updated, it is usually because Apple has put your subscription into PENDING.

We think we are now handing this PENDING process, so you will be able to bid.

If you have trouble, please go to Help => Contact Us
