

# Line Values (NO Vacation)

Note the GREEN Rectangles below..

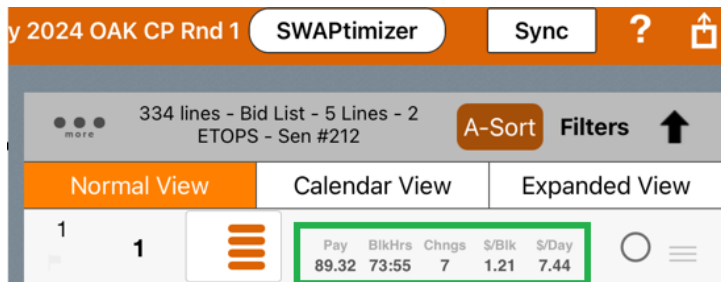

In the ScratchPad, each line displays “LINE VALUES” that are unique to that line.

The shown “LINE VALUES” are the Standard Line Values.

The good news is you can change the “LINE VALUES” to display any 5 of your choosing.

Just touch and hold in the green box to display the “LINE VALUES” menu. You can do this in the ScratchPad or the Bid List.

There are 43 to choose from.

## Aircraft Changes

This Line Value will display all the Aircraft Changes in this line.

[Return to TOP](#)

## Aircraft Type 800

This Line Value will display the number of 800 aircraft in this line.

[Return to TOP](#)

## Aircraft Type 700

This Line Value will display the number of 700 aircraft in this line.

[Return to TOP](#)

## Aircraft Type 8Max

This Line Value will display the number of Max 800 aircraft in this line.

[Return to TOP](#)

## Aircraft Type 7Max

This Line Value will display the number of Max 700 aircraft in this line.

[Return to TOP](#)

## Block of Days Off

This Line Value will display the longest block of days off. If the number is 6, then there is at least one 6 day block of days off.

[Return to TOP](#)

## Block Time

This Line Value will display the total Block Hours (Flight Time) in this line.

[Return to TOP](#)

## cmts

This Line Value will display the number of commutes for the line. If there are 5 trips on the line, there will be 5 commutes.

[Return to TOP](#)

## **cmtFr**

This Line Value will display the number of successful commutes on the Front of the trip. If the number is 0, then it is not possible to commute in on the same day as the trip. You will have to commute in the day prior.

[Return to TOP](#)

## **cmtBa**

This Line Value will display the number of successful commutes on the Back of the trip. If the number is 0, then it is not possible to commute home after the trip lands back in domicile. You will have to commute home the next day.

[Return to TOP](#)

## **cmt%Fr**

This Line Value will display percentage of front-end commutes that are commutable. 40% means that only 2 out of 5 front end commutes are commutable.

[Return to TOP](#)

## **cmt%Ba**

This Line Value will display percentage of back-end commutes that are commutable. 60% means that only 3 out of 5 back end commutes are commutable.

[Return to TOP](#)

## **cmt%Ov**

This Line Value will displays the overall commutability of the line.

[Return to TOP](#)

## **Carry Out Pay**

This Line Value will display the TFP that will be paid in the next bid period.

[Return to TOP](#)

## **coHoli**

This Line Value will display the Holiday Pay in the next bid period

[Return to TOP](#)

## Co+Holi

This line Value will display the total of Carry Out Pay and coHoli Pay

[Return to TOP](#)

## Days Off

This Line Value will display the total number of days OFF in this bid period.

[Return to TOP](#)

## Days of Reserve

This Line Value will display the total number of reserve days.

[Return to TOP](#)

## Deadheads

This Line Value will display the total number of DEADHEADS in this line.

[Return to TOP](#)

## Duty Hours

This Line Value will display the total Duty Hours (report to release) for this line.

[Return to TOP](#)

## Duty Hours Per Day

This Line Value will display the average DUTY HOURS per day of this line

[Return to TOP](#)

## Earliest Departure

This Line Value will display the earliest departure for this line.

[Return to TOP](#)

## eTrips

This Line Value will display the number of ETOPS trips on this line.

[Return to TOP](#)

## Ground Time Average

This Line Value will show you the average amount of ground time between flights.

[Return to TOP](#)

## Ground Time Max

This Line Value will display the maximum ground time between the flights for this line.

[Return to TOP](#)

## HoliRig

This Line Value will display the Holiday Pay override for this line.

[Return to TOP](#)

## Latest Arrival

This Line Value will LATEST ARRIVAL time for this line.

[Return to TOP](#)

## Legs

This Line Value will display the total number of Flights (LEGS) for this line.

[Return to TOP](#)

## Line Rig

This Line Value will display the LINE RIG added to the line if the total Trip TFP for the line is less than the contractual minimums.

[Return to TOP](#)

## Max Legs in a Day

This Line Value will display the maximum number of Flights (LEGS) for any duty day on this line.

[Return to TOP](#)

## NonConUS Legs

This Line Value will display the number of International Flights (LEGS) in this line. Hawaiian Flights are NOT considered NonConUS Flights, they are ETOPS Flights. SJU is a NonConUS Leg.

[Return to TOP](#)

## nMid

This Line Value will display the number of times you will have an overnight in base for this line.

[Return to TOP](#)

## Overnight Average

This Line Value will display the average Overnight time between duty periods

[Return to TOP](#)

## Overnights in Base (OIBs)

This Line Value will display all the overnights in base during the line.

[Return to TOP](#)

## Passes through Base (PTBs)

This Line Value will display the number of times the line passes through the base in the middle of a duty period.

[Return to TOP](#)

## Pay

This Line Value will display the Total Pay you will get for this line (in this bid period) including all RIGs.

[Return to TOP](#)

## Pay+CO

This Line Value will display the Total Pay in this and the Next Bid Period, including all RIGS.

[Return to TOP](#)
